ACCEPTANCE CRITERIA DEFINITION

As a user I want to receive one or more nonsense phrases based on my input sentence so that I can use them for a brainstorm

- show resulting sentence. For example: "The dog is chatting with the table"

As a user I want to receive the syntactic tree on request so that I can know the grammatical structure of the sentence

- show resulting sentence. For example: "The dog is chatting with the table"
- show syntactic tree

As a user I want to see the toxicity level of the resulting sentence so that I can know if to regenerate it

- show resulting sentence if the input sentence doesn't contain toxic terms. For example: "The dog is chatting with the table"
- show error message if the input sentence contains toxic terms. For example: "[ERROR] your input sentence does not respect our policies"

As a user I want to be able to add terms from the input sentence to the record so that I can customize it

- show added word. For example: "apple"
- show validation message with the correct category if the word wasn't already in the record. For example: "apple - [noun]"
- show error message if the word was already in the record. For example: "[apple] - already in the record"

As a user I want to select the verbal time of the resulting sentence so that I can be more coherent

- show list of possible times. For example: "past - present- future"
- show resulting sentence with selected verbal time. For example: "The cat was under the table"

As a user I want to set a specific context so that the resulting sentence can be used to brainstorm a specific context

- show a resulting sentence that chooses correctly the words from the given text. For example: "The pirate is fighting the whale"
- show error message if the given text isn't long enough. For example: "[ERROR] The context hasn't changed, try using a longer text"

SYSTEM TEST REPORT

- **As a user I want to receive one or more nonsense phrases based on my input sentence so that I can use them for a brainstorm**. Successfully tested on May 31st

- **As a user I want to receive the syntactic tree on request so that I can know the grammatical structure of the sentence**. Successfully tested on May 31st

- **As a user I want to see the toxicity level of the resulting sentence so that I can know if to regenerate it**. Successfully tested on May 31st

- **As a user I want to be able to add terms from the input sentence to the record so that I can customize it**. Successfully tested on May 31st

- **As a user I want to select the verbal time of the resulting sentence so that I can be more coherent**. Successfully tested on May 31st

- **As a user I want to set a specific context so that the resulting sentence can be used to brainstorm a specific context**. Successfully tested on May 31st
